

Target Market Determination: Shared Ownership Home Loan

What's a Target Market Determination?

A Target Market Determination (TMD) is a written document that describes the target market for a product (ie, who a product is appropriate for), the key attributes of a product and how a product is being distributed. A TMD also sets out when reviews need to be conducted and the relevant information that is needed by distributors of the products to identify the need for a review. A TMD is not a determination that any person is within the target market for a product. A TMD does not summarise all terms, criteria or obligations associated with a product. For more information about TMDs go to [Target Market Determination | Keystart](#). For more information about our shared ownership home loans go to [Shared Ownership Home Loan \(keystart.com.au\)](#).

TMDs keep customers at the centre of our approach to the design and distribution of our financial products.

Loan Attributes for all Shared Ownership Home Loans

Low entry costs: low deposit and no lender's mortgage insurance to allow entry into home ownership sooner.

Western Australian Housing Authority will co-own a share of the property, which lowers the loan amount and reduces the ongoing monthly repayments. The Housing Authority's share in the property is dependent on the different shared ownership sub-products, each being subject to a maximum percentage contribution from the Housing Authority.

No monthly account keeping fees.

Weekly, fortnightly and monthly payment frequency options available.

Standard variable interest rate based on the Reserve Bank of Australia's (RBA) cash rate plus a margin. This margin is subject to change. As a variable rate, the rate can go up or down over time in line with any movement to the RBA cash rate and any changes to the margin. Given the low deposit nature of its home loan lending, Keystart's interest rates policy enables it to manage lending risk responsibly.

Ability to make additional repayments at no extra cost.

Either a flexible or fixed shared ownership type:

- Flexible shared ownership – customers can refinance or purchase more shares in the property when they are in a financial position to do so.
- Fixed shared ownership – customers are unable to purchase further shares in the property.

Up to maximum 30-year term.

Maximum loan amount as determined by Housing Authority (*not applicable to the Urban Connect Shared Equity Home Loan*).
